ABOUT ME

I graduated from the Computer Programming department in 2020. After completing the initial phase of my education at Sakarya University, I gained my first internship experience in the field of web development there. Throughout this process, I acquired foundational knowledge in web development and had the opportunity to enhance my practical skills.

Subsequently, I transferred to the Information Systems and Technologies department at Trakya University. Here, I decided to take a step into the fields of data science and artificial intelligence, and I took my first steps by completing an internship in this area. Currently, I have been working at Quedyne company as an ML and Backend Developer for 7 months. During this time, I not only improved my skills in machine learning but also advanced my software development capabilities. By effectively combining my adaptability to challenging and fast-paced working conditions with my experience in innovative projects, I achieve impactful results.

What matters most to me is building a sustainable career in the field of data science and artificial intelligence, and utilizing my abilities to create added value. In line with this, I aspire to explore new opportunities in a challenging and dynamic work environment.

WORK EXPERIENCE

Web Developer Intern

Codegen Bilgisayar Technologies [08/2018 – 02/2019]

City: İstanbul

Country: Türkiye

Website: https://www.codegen.com.tr/

Business or sector: Information and communication

- I have designed and developed several WordPress websites, skillfully utilizing Adobe Photoshop, Illustrator, and Canva to create visually appealing graphic designs.
- I have also proficiently executed backup operations using both CPanel and Plesk panels offered by the web hosting provider. My expertise in HTML, CSS, and JS has enabled me to create responsive web designs, which I have further integrated with database and logic operations using PHP and MySQL.

Data Analytic Intern

Depixen [07/2022 – 09/2022]

City: İstanbul

Country: Türkiye

Website: https://www.depixen.com/

Business or sector: Information and communication

- Aligned with project objectives, I executed data analytics studies following the OSEMN model. In accordance with assigned tasks, I constructed datasets aligned with business requirements and conducted analysis, subsequently formulating operational strategies.
- I undertook data collection and analysis leveraging Google services including Firebase, AppScript, and Analytics. I orchestrated data flow through the AppScript and Firebase platforms, effecting integration between SQL and NoSQL databases, and authored Node.js scripts for this purpose.
- I authored Python scripts tailored to project needs, employing IDEs such as PyCharm, Anaconda, VSCode, Jupyter, and Spyder.
- I harnessed Turkish NLP models developed by the HuggingFace community, contributing to data visualization and performance assessment of NLP models. I collaboratively devised a Firebase-centric decision support system with the team, founded on user surveys.

Jr. Data Scientist

Quedyne Robocare [02/2023 – Current]

City: İstanbul

Country: Türkiye

Website: https://quedyne.com/

Business or sector: Human health and social work activities

- Datasets were meticulously curated using web scraping techniques and various APIs, facilitating the collection of both visual and textual data to adhere to project specifications.
- Database structures were meticulously crafted, encompassing PostgreSQL, SQL, NoSQL, and Big Data databases. Efforts were devoted to optimizing database performance, initiating impactful initiatives.
- The orchestration of database integration within the Azure environment became a focal point. This involved comprehensive projects centered around Azure SQL and PostgreSQL databases. Azure Triggers were employed to activate purpose-built Python scripts, Azure endpoints were meticulously configured to facilitate mobile application usage, and rigorous testing was executed on Azure Virtual Machines.
- Leveraging advanced deep learning architectures like CNN and RCNN, an intricate deep learning network was formulated by meticulously annotating a multitude of images. Collaborating synergistically with team members, the deployment of this network was seamlessly executed on Azure servers. Furthermore, the groundwork was laid for the development of a model aligned with the Active Learning methodology.
- A comprehensive engagement with libraries such as TensorFlow, PyTorch, and Scikit-learn became an integral part of my journey. This period of immersion greatly enriched my mastery in core concepts, as well as the finer aspects of data manipulation, data augmentation, and data mining

EDUCATION AND TRAINING

Computer Programming

Sakarya University [09/2018 – 06/2020]

City: Sakaya

Country: Türkiye

Website: https://www.sakarya.edu.tr/

Field(s) of study: Information and Communication Technologies

Trakya University

Information Systems and Technologies [09/2020 – 06/2022]

City: Edirne

Country: Türkiye

Website: https://www.trakya.edu.tr/

Field(s) of study: Information and Communication Technologies

Thesis: Derin öğrenme tabanlı yöntemler kullanarak uydu görüntülerinden elde edilen verilerle tarımsal alanların sınıflandırılması ve analizi

LANGUAGE SKILLS

Mother tongue(s): **Türkçe**

Other language(s):

İngilizce

LISTENING B2 **READING** B2 **WRITING** B1

SPOKEN PRODUCTION B1 **SPOKEN INTERACTION** B1

Almanca

LISTENING A1 **READING** A1 **WRITING** A1

SPOKEN PRODUCTION A1 **SPOKEN INTERACTION** A1

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

DIGITAL SKILLS

Google Firebase / Wordpress (Orta Seviye) / Excellent Microsoft Office skills (Outlook, OneDrive, Word, Excel, PowerPoint, etc.) / SASS / Data Gathering, Data Processing, Data Visualization, Data Analysis / Machine Learning / Deep Learning / Slack (Virtual Chat Rooms Events) / JavaScript / Git, Github / Jenkins / Statistical Machine Learning / MySQL / Docker / Github

Programming Skills

NoSql / ReactJs (Temel-Orta Seviye) / C# / Python / SQL / HTML / Java / CSS

DRIVING LICENCE

Driving Licence: B1

Driving Licence: B

PROJECTS

QPFace

[04/2023 – Current]

QP Face is a mobile application designed to thoroughly analyze facial photos uploaded by users to the system on a daily or weekly basis. It provides users with detailed information about the characteristics of their faces across various areas of interest. The study is built upon solid foundations and has been meticulously researched. It is currently in the development phase.

MateDrone

[05/2023 – Current]

Mate Drone is an R&D project aimed at developing a single drone equipped with various sensors for civil search and rescue, remote sensing, and providing real-time information to the operator with high precision and sensitivity. It's designed to operate in areas that are inaccessible or hazardous for humans, delivering instantaneous data through its array of sensors.
